

Titanium Mill Products, Ingot, and Castings

U.S. Department of Commerce
BUREAU OF THE CENSUS

OCTOBER 1984

ITA991(84)-10
Issued January 1985

The statistics in this publication are based on a survey of manufacturers and represent total U.S. shipments of titanium mill products, ingot, and castings. Estimates are included for companies whose reports were not received in time for tabula-

tion. A description of the survey methodology and related information appears in the January 1984 report for this series, ITA991(84)-1, issued April 1984.

²Source: Bureau of the Census report EM 54b, U.S. Exports.

³These values were derived by use of adjustment factors to exclude freight, insurance, and other charges incurred in moving goods to the port of export. This adjustment is made to convert the values to an approximation of the producers' value of exported goods. Current adjustment factors are based on data for 1981 which are published in *Origin of Exports of Manufactured Products*, MB1(AS)-5, appendix B. Comparable adjustment factors for earlier years are based on similar factors developed for 1971 and 1972. The current adjustment factor for this report is 0.9731.

⁴Source: Bureau of the Census report EM 145-X, U.S. Imports for Consumption and General Imports.

⁵The value includes c.i.f. (cost, insurance, and freight) at the first port of entry in the United States plus U.S. import duties and other charges to the import point.

⁶Apparent consumption is derived by subtracting exports from the total of net shipments plus imports.

⁷Comparability of output, export, and import classifications for ingot and billet assume that bloom, sheet bar, and slab are reported as ingot or billet in the output numbers. Figures for imports of ingot and billet also include powder, crystal, and similar forms which are excluded from the output and export numbers.
